- A Check is Enclosed in the Foregoing Amount Due.
- Petition is hereby made under 37 C.F.R. 1.136(a) to extend the time for response to the Office Action of January 29, 2001 to and through March 29, 2001 comprising an extension of the shortened statutory period of 1 month(s).
- The Commissioner is hereby requested to grant an extension of time for the appropriate length of time, should one be necessary, in connection with this filing or any future filing submitted to the U.S. Patent and Trademark Office in the above-

identified application during the pendency of this application. The Commissioner is further authorized to charge any fees related to any such extension of time to deposit account 23-3050. This sheet is provided in duplicate.

×	The C	Commissioner is authorized to charge payment of the following fees and to			
		refund any overpayment associated with this communication or during the pend of this application to deposit account 23-3050. This sheet is provided in duplication			
		The Foregoing Amount Due for Filing this Paper.			
	×	Any additional filing fees required, including fees for the presentation of extra claims under 37 C.F.R. 1.16.			
	×	Any additional patent application processing fees under 37 C.F.R. 1.17 or 1.20(d).			

SHOULD ANY DEFICIENCIES APPEAR with respect to this application, including deficiencies in payment of fees, missing parts of the application or otherwise, the United States Patent and Trademark Office is respectfully requested to promptly notify the undersigned.

PHENYLALANINE DERIVATIVES

I, Gregory L. Hillyer, Registration No. 44,154 certify that this correspondence is being deposited with the U.S. Postal Service as First Class mail in an envelope addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231.

On March 29, 2000

Gregory L. Hillyer, Reg. No. 44,154

Assistant Commissioner for Patents Washington, D.C. 20231

Dear Sir:

REPLY UNDER 37 C.F.R. § 1.146 TO OFFICE ACTION DATED JANUARY 29, 2001

This is in response to the Requirement For Restriction mailed on January 29,

2001.

A restriction has been required to one of three groups of inventions, classified as Groups I, II, and III. Group I (claims 1-19) is drawn to a compound of formula (Ia) wherein R¹ is an optionally substituted phenyl, a method of treating diseases comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted phenyl, a method of inhibiting

DOCKET NO.: CELL-0072 PATENT

an α4β7 integrin binding to ligands comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted phenyl, and pharmaceutical compositions comprising a compound of formula (Ia) wherein R¹ is an optionally substituted phenyl. Group II (claims 1-19) is drawn to a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl, a method of treating diseases comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl, a method of inhibiting an α4β7 integrin binding to ligands comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl, and pharmaceutical compositions comprising a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl. Group III (claims 1-19) is drawn to a compound of formula (Ia) wherein R¹ is an optionally substituted pyrimidinyl, a method of treating diseased comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted pyrimidinyl, a method of inhibiting an $\alpha 4\beta 7$ integrin binding to ligands comprising administering a compound of formula (Ia) wherein R¹ is an optionally substituted pyrimidinyl, and pharmaceutical compositions comprising a compound of formula (Ia) wherein R¹ is an optionally substituted pyrimidinyl.

It is asserted in the Office Action that Groups I, II, and III are unrelated in that they have different modes of operation, different functions, or different effects. Specifically, the Office Action contends that the "different inventions" can be used as inhibitors of beta amyloid protein production or as protease inhibitors. The mere fact, however, that certain phenylalanine derivatives may inhibit beta amyloid protein production or protease, does not mean that these

DOCKET NO.: CELL-0072 PATENT

derivatives have different modes of operation, functions, or effects *in the disclosed invention*. Thus, it is submitted respectfully that the restriction requirement is deficient in that a showing has not been made that the involved claims are directed to independent inventions. Inventions are only deemed "independent" if there is no disclosed relationship and/or if the inventions are unconnected in design, operation or effect. *See* M.P.E.P. §802.01. Applicants, however, *have* disclosed a common relationship involving, *inter alia*, inhibition of $\alpha 4\beta 7$ integrin by compounds having a common phenylalanine core. This common relationship establishes that the subject matter is not misjoined as the Office Action suggests.

The purpose of § 121 is to avoid a situation which requires that separate and diverse searches be conducted on claims directed to independent (unrelated) subject matter. That is not the situation here because the relationship among the compounds of formula (Ia) is such that a reasonable search for phenylalanine derivatives generally would necessarily lead to disclosures, to the extent any exist, of compounds wherein R¹ is either an optionally substituted phenyl, pyridyl, or pyrimidinyl. Accordingly, Applicants submit respectfully that it is incumbent upon the Examiner to conduct such a search.

Applicants hereby elect for prosecution Group II (claims 1-19), which is drawn to a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl, a method of treating diseases comprising administering a compound of formula (Ia) wherein R¹ is an optionally

¹ 35 U.S.C. §121 states that an application can be restricted if two or more inventions are, *inter alia*, independent.

DOCKET NO.: CELL-0072 PATENT

substituted pyridyl, a method of inhibiting an α4β7 integrin binding to ligands comprising

administering a compound of formula (Ia) wherein R¹ is an optionally substituted pyridyl, and

pharmaceutical compositions comprising a compound of formula (Ia) wherein R¹ is an optionally

substituted pyridyl, with traverse. Applicants hereby affirm the right to file one or more

divisional applications with respect to any of the non-elected subject matter.

Conclusion

Applicant believes that the foregoing constitutes a complete and full response to

the Office Action of record. Accordingly, an early and favorable action on the merits is

requested respectfully.

Respectfully submitted,

Gregory L. Hillyer
